

Stove Accessories > Ecofans

Ecofan 800

The Ecofan is a self powered stove fan which increases your stove's efficiency by circulating warm air directly into the living area. The Ecofan has a thermoelectric module which acts as a small generator to power the fan's motor.

- Generates its own electricity using the heat of the stove
- Fan outputs 100 CFM to help circulate warm air throughout the room
- Number of blades: 2
- Fan speed varies automatically with the stove temperature
- Ultra quiet
- Airflow: up to 100 CFM, base: 4" x 3", height: 8-1/2", rotor diameter: 8"

Ecofan 802

Ecofan Airplus Mdl.802 thermoelectric self-powered stovetop fan which increases your stove's efficiency by circulating warm air directly into the living area. The Ecofan has a thermoelectric module which acts as a small generator to power the fan's motor.

- Generates its own electricity using the heat of the stove
- Fan outputs 150 CFM to help circulate warm air throughout the room
- Tri-blade delivers broad range of warm air
- Dual Heat Controllers in the base to help prevent overheating
- Fan speed varies automatically with the stove temperature
- Airflow: up to 150 CFM, base: 4-1/2" x 3", height: 10", rotor diameter: 9", 3 blades
