

Flashings > Master Flash[®] > Installation

- Masterflash can be easily installed on-site quickly and easily, usually under 10 minutes.
- One-piece construction makes Master Flash easy to handle
- Bendable base forms seal with any contour, surface irregularities or roof pitch
- Seals tightly and dependably with silicone sealant to eliminate costly call-backs
- Pipe opening is easily customized with a sharp knife or scissors for any application

Installation »

SELECT & TRIM...

Choose appropriate Master Flash with opening at least 20% smaller than pipe diameter. If necessary trim opening to 20% smaller than pipe diameter.

SLIDE...

Slide Master Flash down over pipe. (A non-petroleum base lubricant will ease installation.)

FORM...

Press Master Flash down, bending it to conform to roof profile or roof irregularities. A blunt tool will help press flashing into tight roof angles.

SEAL...

Apply silicone sealant between base and roof.

FASTEN...

Use fastener to complete sealing. For UPC installation, fastener spacing may not exceed 1½" @ (38mm).
